

REMARKS

This Amendment is responsive to the Office Action of November 5, 2004. Claim 27 has been amended. Claims 1 - 30 remain pending in this application. Reexamination and reconsideration are respectfully requested.

The Examiner rejected claims 27 – 30 under 35 USC 112, second paragraph, as being indefinite. This rejection is respectfully traversed.

Claim 27 has been amended to overcome this objection by deleting the term “substantially” which the Examiner objected to as inconsistent with Claim 28. It is respectfully submitted that the term “substantially” varies with the specific application and for some applications, e.g. HDTV, the 10% limitation of Claim 28 will be substantial and not inconsistent with original Claim 27. Accordingly, it is respectfully submitted that the language did not render the claim indefinite and the amendment has purely been made to expedite allowance of the application and not for patentability reasons.

The Examiner rejected claim 27 under 35 USC 102(e) as anticipated by the patent no. US 6,621,593 to Wang et al. This rejection is respectfully traversed.

Without acquiescing in the Examiner's position, Claim 27 has been amended to clarify that the act of “correcting scan line length variation...” employs adjusting the scan line timing. It is respectfully submitted this clearly overcomes the rejection since no such timing adjustment is disclosed in the cited reference. Accordingly, it is respectfully submitted this rejection is fully traversed.

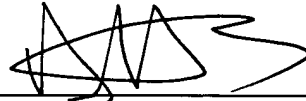

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance and a Notice of Allowance is respectfully requested. It is

Application No. 10/779,986
Art Unit 2614

requested that the Examiner telephone the undersigned attorney if it appears that any impediment remains to allowance of the application.

Respectfully submitted,

Date: 3-7-05
